## Overview

The purpose of Dustman is to get rid of those Network Trash Can's that tends to escalate in both size and numbers when OS9 users use OSX sharepoints. Those Network Trash Can's may cause problems like full disks, slow backups etc. Dustman searches the paths of your choice, looking for Network Trash Cans and erasing them without mercy.

## The interface

The interface consists of three parts, "Dust", "Paths" and if you have bought the full version "Schedule".

### The Disk tab

The Paths tab let you define which paths that Dustman should search in. The more accurate path the quicker Dustman will find the Network Trash Cans. Typical places to look are the folders that you share.

### The Schedule tab

The Schedule tab gives you the option to schedule Dustman so that the search for Network Trash Cans may be automated. This option is only available in the full version.

### The Dust Tab

The Dust Tab consists of only one button, the Dust button. Click the button and enjoy the ride, it may take some time to search your disks so make sure that you have defined relevant paths under the paths tab.
